

Protect-Ya Bike

The latest in bike protection padding

- Designed to shield bike frames during transit from scratching and poor handling
- Easy to install clip on tubes, safe and durable
- No taping is required
- Stronger PE closed cell foam padding compared to softer rubber tubing and other alternatives.
- Tailor the foam lengths to suit your bike and protect your pride and joy
- Easy to install/remove
- Fits most size frame tubing, with other sizes available
- Cut and fit around derailleur, handlebars & gear levers

Thermotec bike frame protectors are manufactured from heavy duty closed cell protective foam. The padding tubes are supplied in kit form and will suit most bike frames.

Installation is easy as each foam length is cut to suit the individual tube diameters and lengths. Then you slit the length of the foam padding and simply clip over the bike tube. Each tube is then marked to identify its tube position for ease of repackaging.
